

Editorial Preface

The theme of this journal is in the area of Robust Engineering and Quality Management. We would like to disseminate and share new knowledge relating to this area both from practitioners and academics. It is a peer reviewed journal offering an open forum and communicate your research results in the field of Robust Engineering and Quality Management, and at the same time, to promote the exchange of research ideas, knowledge and experiences, implementation, case studies and results researchers have obtained.

Journal of Advanced Research in Robust Engineering & Quality Management focuses on original high-quality research and to provide a platform for researchers, engineers, academicians as well as industrial professionals from all over the world to present their current research work. The contributions in this journal can stimulate ideas in further research and knowledge generation amongst scholars with similar interests.

The scope of the journal includes: Robust Design, Taguchi Method and Techniques, Mahalanobis Taguchi System (MTS), Statistical Quality Engineering, Advanced Quality Management, Lean Engineering, Sustainable Engineering, and new emerging topics relevant in this knowledge domain.

It is our hope that this excellent collection of research reports will be used to advance and share knowledge amongst readers of this Journal of Advanced Research in Robust Engineering & Quality Management. We sincerely invite the submission of technical manuscripts on all the areas of Robust Engineering and Quality Management to this journal.

Editor-in-Chief

Dr Khairur Rijal Jamaludin
